## Report on
## Innovative Teaching and Learning Activity

| | |
|---|---|
| **Activity Name** | **:** AI Research League 2.0 – 2026 |
| **Organized By** | : AI Student Chapter |
| **Target Participants** | **:** MCA (Integrated) – II to V, MCA – I & II |
| **Registered Participants** | : 114 participants across UG (28) and PG (86) |
| **Resource Persons** | : Director, HODs of BCA, MCA & MCA (Integrated), and BBA, along with **3 invited industry expert judges** |
| **Venue** | **:** Activity Hall, IMRD Shirpur |
| **Event Date** | : 19/09/2026 |

AI Student Chapter

### Need of Activity

Research in Artificial Intelligence is a rapidly growing area, but students often face challenges in identifying meaningful real-world problems and presenting practical, research-oriented solutions. Many students focus primarily on basic application development without conducting structured research or building user-centered solution prototypes.

**AI Research League 2.0 – 2026** was organized to provide students with an interactive, multi-stage platform to research real-world AI challenges, develop innovative AI-driven solutions, and present their work. Moving beyond traditional slide decks, AIRL 2.0 required teams to build an interactive landing page/prototype alongside their PowerPoint presentation (PPT). This enhanced requirement enabled students to demonstrate both theoretical depth and the practical, user-facing viability of their proposed solutions.

### Objectives

- To foster a research-oriented mindset by encouraging students to investigate real-world problem statements.
- To give students hands-on experience in applying Artificial Intelligence tools, frameworks, and methodologies to real-world challenges.
- To introduce students to structured research practices, including problem formulation, literature review, and gap identification.
- To bridge the gap between abstract concepts and functional products by requiring interactive landing page / prototype development alongside PPT presentations.

- To enhance teamwork, critical thinking, logical reasoning, and technical presentation skills.
- To provide direct industry exposure through feedback and evaluation by expert alumni and industry leaders.

**Preparatory Workshops & Pre-Event Timeline**

Prior to the final competition on September 19, 2026, the AI Student Chapter conducted comprehensive preparatory activities, workshops, and student-led awareness drives:

1. **Awareness Sessions – "What is AI Research League?":**

- Class-level sessions delivered across IMCA-II through IMCA-V and MCA-I/II by student ambassadors (Ms. Krushnali Jadhav, Ms. Ruchita Chaudhari, Mr. Moin Ansari, Mr. Shrikant Borase, and Mr. Kartik Valhe).

2. **Technical Demos – "PPT Demo & Landing Page Examples":**

- Hands-on orientation on structuring research slides and developing landing pages delivered by student presenters.

3. **Faculty-Led Research Workshops – "How to Do Research":**

- Conducted by **Dr. Manoj N. Behere** and **Mrs. Chhaya S. Patil** for IMCA II–III students, focusing on problem statement formulation and research methodologies.

4. **Case Study Showcase:**

- *Empowering Women's Safety with AI* (Presenter: Ruchita Chaudhari).
- *Smart Traffic Management System* (Presenter: Shrikant Borase).

5. **Mentor Meetup:**

- Each registered team was paired with a dedicated faculty/peer mentor to receive personalized guidance during proposal development.

AI Student Chapter

**Problem Statement Bank**

Students were provided with an extensive **Problem Statement Bank** across 12 key domains, though teams were also given the flexibility to identify and propose their own custom problem statements:

- **Healthcare & Medical AI**
- **Education & Learning AI**
- **Finance & Business AI**
- **Environment & Sustainability AI**
- **Security & Law Enforcement AI**
- **Smart Cities & Daily Life AI**
- **Agriculture & Food AI**
- **Transportation & Automotive AI**
- **Retail & E-Commerce AI**
- **Sports & Entertainment AI**
- **Human Resources & Workplace AI**
- **Space, Accessibility & Manufacturing AI**

**Team Registration & Category Classification**

A total of **36 teams** registered for AI Research League 2.0. While teams were categorized into Undergraduate (UG) and Postgraduate (PG) divisions based on academic year, all teams competed under a unified, overall ranking framework.

- **Classification Criteria:** Students from MCA (Integrated) 2nd, and 3rd years were classified under the **UG Division**, while students from MCA (Integrated) 4th & 5th years and regular MCA 1st & 2nd years were classified under the **PG Division**.
- **Summary of Participation:**
    - **UG Division (7 Teams):** Focused on innovative projects spanning centralized campus communication, real-time community safety, water quality monitoring, banking fraud detection, AI mental health tools, sustainable farming, and fake news detection.
    - **PG Division (29 Teams):** Covered diverse AI domains including emergency donor ranking, fake job detection, automated code review, clinical prescription support, smart urban waste management, rural retail inventory optimization, sign language translation, forest fire prediction, and civic issue resolution platforms.

AI Student Chapter

**Event Schedule & Activity Details**

The main competition took place on **September 19, 2026**, divided into two sessions:

- **Session I: Pre-Competition & Presentations (10:00 AM onwards):**
  - Welcome address, e-inauguration, and competition overview.
  - Director's speech emphasizing the importance of turning ideas into real-world, evidence-based solutions.
  - Presentation rounds where teams showcased their research problem, methodology, PPTs, and interactive landing pages before the judging panel.
- **Session II: Post-Competition & Valedictory (3:30 PM onwards):**
  - Appreciation ceremony for the outgoing AI Student Chapter team and official appointment of the new student leadership team.
  - Feedback provided by invited industry judges.
  - Prize distribution, group photographs, and formal vote of thanks.

**Chief Guests & Industry Judges**

The competition entries were evaluated by eminent industry practitioners and alumni:

1. **Mr. Shubham Jadhav** – Teamcenter Administrator & Support, Tata Technologies, Pune.
2. **Mr. Sagar Badgujar** – Lead Consultant (SAP SD), Hitachi Energy.
3. **Mr. Mukesh Badgujar** – Senior Software Developer, Aditya Birla Capital, Thane (Alumni of MCA).

**Summary of Scoring Rubric**

Teams were evaluated out of a total of **50 points** based on five core criteria (scored from 1 to 10 points each):

1. **Problem Definition & Innovation (10 Points):** Assesses the clarity, relevance, and originality of the identified real-world problem statement.
2. **Technical Approach & Research Depth (10 Points):** Evaluates the rigor of the methodology, research depth, and understanding of technical choices and trade-offs.
3. **Feasibility & Implementation Plan (10 Points):** Measures the practical execution plan, constraint awareness, and usability of the interactive landing page / prototype.
4. **Impact & Ethical Considerations (10 Points):** Evaluates societal value, potential real-world adoption, and awareness of ethical issues and data privacy.
5. **Communication & Presentation (10 Points):** Assesses slide design, prototype demonstration quality, verbal communication, and handling of Q&A.

AI Student Chapter

**Outcomes**

- **Enhanced Research Capabilities:** Students learned to identify real-world problems, conduct literature reviews, and define precise research questions rather than focusing solely on coding.
- **Practical Solution Visualization:** Requiring interactive landing pages/prototypes forced teams to validate user experience, functional requirements, and market feasibility.
- **Industry Alignment:** Direct interaction with industry experts provided students with practical feedback regarding real-world AI deployment and industry standards.
- **Peer Collaboration & Confidence:** Participating in a competitive, multi-session league improved student teamwork, public speaking, and presentation skills.

## Winners Declaration & Prize Distribution Report: AI Research League 2.0 (AY 2026-27)

| | |
|---|---|
| **Event Name** | **:** AI Research League 2.0 – 2026 |
| **Organized By** | **:** AI Student Chapter (AISC) |
| **Evaluation Framework** | **:** Combined Overall Ranking across UG and PG Divisions |
| **Registered Participants** | : 114 participants across UG (28) and PG (86) |
| **Judging Panel** | **:** Mr. Shubham Jadhav (Tata Technologies),<br>Mr. Sagar Badgujar (Hitachi Energy),<br>Mr. Mukesh Badgujar (Aditya Birla Capital) |
| **Venue** | **:** Activity Hall, IMRD Shirpur |
| **Date of Event & Declaration** | **:** 19/09/2026 |

**Overview of Winners Evaluation:**

During Session II of the **AI Research League 2.0** on September 19, 2026, the final rankings and award winners were formally declared following a rigorous evaluation by the industry judging panel. Out of 36 competing teams across Undergraduate and Postgraduate categories, teams were judged based on a 50-point rubric assessing Problem Definition, Technical Depth, Implementation Feasibility (including Prototype/Landing Page execution), Social & Ethical Impact, and Presentation Clarity.

**Official List of Winning Teams:**

**1st Rank (Winner)**

- **Team Name:** P4YL04D C4RT3L
- **Team ID:** PG_126
- **Category:** Postgraduate Division (IMCA 4th Year)
- **Project Topic:** Heuristic-Driven Kernel-Level Mitigation of Rogue HID Injections Using Statistical Anomaly Modeling
- **Team Members:**
  - **Aniruddha Balaji Landge** *(Team Leader)*
  - **Hariom Prakash Patil**
  - **Tanaya Pandharinath Patil**
  - **Durvesh Sandeep Bari**

AI Student Chapter

**2nd Rank**

- **Team Name:** AQUASAKSHAM
- **Team ID:** UG_103
- **Category:** Undergraduate Division (IMCA 3rd Year)
- **Project Topic:** Real-Time Intelligent Water-Quality Monitoring & Risk Assessment System
- **Team Members:**
  - **Danish Salim Pinjari** *(Team Leader)*
  - **Himanshu Rajendra Pawar**
  - **Ashwini Ajay Pawar**
  - **Janhavi Krishna Soni**

**3rd Rank**

- **Team Name:** NeuroNova
- **Team ID:** PG_116
- **Category:** Postgraduate Division (MCA 1st Year)
- **Project Topic:** Automated Computer-Vision Sign Language Translation & Speech Conversion System
- **Team Members:**
  - **Afreen Irfan Pinjari** *(Team Leader)*
  - **Dhanashri Yogesh Patil**
  - **Ashvini Suresh Patil**
  - **Ruchita Anil Kale**

**Runner-up Position**

- **Team Name:** Alpha Squad
- **Team ID:** PG_123
- **Category:** Postgraduate Division (MCA 1st Year)
- **Project Topic:** Machine Learning-Based ATM Cash Demand Prediction & Cash Replenishment System
- **Team Members:**
  - **Neha Bikkan Patil** *(Team Leader)*
  - **Komal Prakash Patil**
  - **Vaishnavi Nilesh Chaudhari**

AI Student Chapter

**Winners Summary Matrix:**

| Position / Award | Team Name | Team ID | Division & Class | Project Domain / Research Title |
|---|---|---|---|---|
| **1st Rank** | **P4YL04D C4RT3L** | PG_126 | PG (IMCA 4th Yr) | Kernel-Level Rogue HID Injection Mitigation |
| **2nd Rank** | **AQUASAKSHAM** | UG_103 | UG (IMCA 3rd Yr) | Real-Time Water-Quality Monitoring System |
| **3rd Rank** | **NeuroNova** | PG_116 | PG (MCA 1st Yr) | Automated Sign Language Translator |
| **Runner-up** | **Alpha Squad** | PG_123 | PG (MCA 1st Yr) | ATM Cash Demand Prediction using ML |

**Prize Distribution Details:**

- The winning teams were awarded trophy mementos, official certificates of achievement, and cash prizes during the valedictory session by the Director, Department HODs, and guest judges.
- Special appreciation was noted by the judging panel for **Team AQUASAKSHAM** (UG Division) for securing 2nd Rank in the combined overall standings, demonstrating high research potential among undergraduate batches.
