Code-Carnival Hackathon

Theme: Open Innovation

Overview

Code-Carnival is an open innovation hackathon designed to encourage creativity, problem solving, and collaboration among students. Participants can choose from a variety of domains and build innovative solutions to real-world problems. The hackathon welcomes beginners as well as experienced developers.

Hackathon Domains

- Artificial Intelligence & Machine Learning
- Web Development
- Mobile App Development
- Cybersecurity
- Blockchain
- Internet of Things (IoT)
- EdTech (Education Technology)
- HealthTech
- FinTech
- Open Innovation (Any Creative Technology Solution)

Beginner Level Problem Statements

Smart Study Planner

Develop a web or mobile application that helps students organize their study schedule, set reminders, and track completed tasks.

Campus Event Finder

Create a platform where students can discover upcoming events, workshops, and hackathons happening in their college.

Digital Lost & Found System

Build a system where students can report lost items and others can post found items to help return them to the rightful owner.

Simple Expense Tracker

Develop a beginner-friendly personal finance tracker that allows users to log daily expenses and view spending summaries.

AI Chatbot for College Queries

Create a chatbot that answers common college-related questions such as admission, courses, schedules, and campus facilities.

Health Reminder App

Build an app that reminds users to drink water, take medicine, or follow a daily fitness routine.

Skill Sharing Platform

Develop a platform where students can teach and learn skills from each other (coding, design, music, etc.).

Eco-Friendly Campus Idea Platform

Create a platform where students can submit and vote on ideas to make their campus more sustainable and eco-friendly.

Coding Practice Tracker

Build a simple web application that helps users track their coding practice and daily learning streaks.

Local Help Finder

Develop a platform where people can request or offer small help in their local community (e.g., notes sharing, tutoring, etc.).
